to research,
me

Dear tshingombe tshitadi,

Thank you for submitting your slides "Thesis. Degree honor, council quality rules low become justice development court and labor relations conciliation mediation, Engineering electrical trade research policy skill ,safety security order develop ,defense order " to F1000Research - I'm afraid that as your uploaded file doesn't appear to be a scholarly poster or slide, we're unable to accept it for publication. As such, we have rejected your slides.

If you've any questions please don't hesitate to ask, we're always happy to help,

Best regards,

The F1000Research Team

to
marschin@salesforce.nsf.gov,
me

Dear tshingombe,

Thank you for submitting your company's Project Pitch to America's Seed Fund powered by the National Science Foundation.

Upon reviewing your submitted Project Pitch, I regret to inform you that you are not invited to submit a full proposal to the NSF SBIR/STTR Phase I program.

Your proposed project was not invited for the following reasons:

- This Project Pitch does not sufficiently articulate the development of a new, high-risk, technological innovation, as defined in the SBIR/STTR solicitation.

The NSF SBIR/STTR Phase I program is designed to support high-risk technology innovation. As stated in our SBIR/STTR program solicitations, projects that are not responsive to the objectives of the NSF SBIR/STTR Phase I program include:

- Evolutionary development or incremental modification of established products or proven concepts.
- Straightforward engineering efforts with little technical risk;
- Evaluation or testing of existing products
- Basic scientific research unconnected to any specific market opportunity or potential new product, process or service.
- Projects seeking funding for non-technical activities (such as business development, market research,

and sales and marketing) as well as manufacturing, indirect research and development, and patent costs. Note that NSF's Beat The Odds Boot Camp activity represents an exception to the aforementioned restriction.

Please reference our current NSF SBIR/STTR Phase I program solicitation for more details:

<https://seedfund.nsf.gov/solicitations/>

In addition, our review of your Project Pitch determined that this project would also not meet the eligibility criteria to participate in the SBIR/STTR Fast-Track program, for the following reasons:

Does not meet the NSF research lineage and customer discovery requirements

I hope that you found this feedback useful and encourage you to re-evaluate your project innovation and objectives if seeking funding through the NSF SBIR/STTR Phase I or Fast-Track program. You are welcome to resubmit a revised version of this Project Pitch to a future submission window, if you feel you can substantially address the above feedback.

Questions? Please visit our program [website](#) for more information about the Project Pitch process, review criteria, current SBIR/STTR Phase I solicitations, and upcoming informational webinars.

Thank you,

Mara Schindelholz
